

Dr. Zoomlove or:

How I Learned To Stop Worrying And Drop The Bomber

Prepare your districts and groups ahead of time

- Get a host key from your meeting/district Zoom admin.
- Make sure the key is in the script or given to the chair/zoom host.
- Point them to this slideshow.

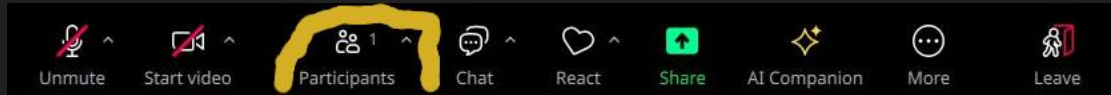

So you have a bomber in your meeting

- At the bottom of your screen is the Zoom menubar.

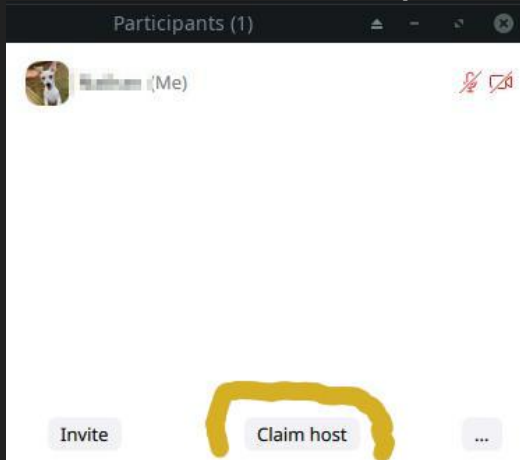

- Click on “Participants”.

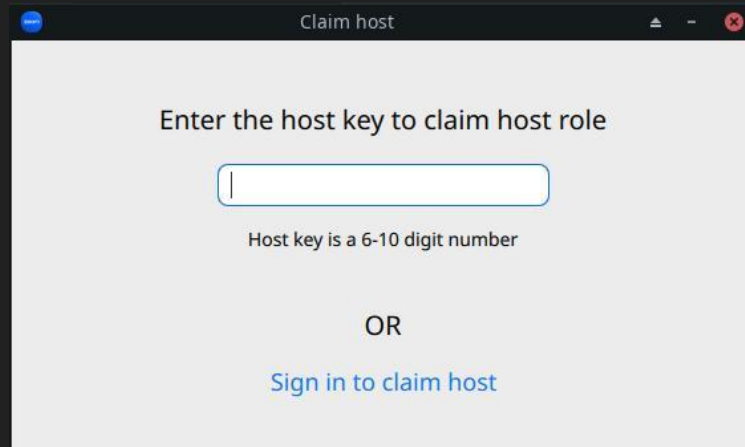

Claim Host

Click the “Claim Host” button then the claim host window will open.

Enter the host key in the text field and press Enter, then you will have host privileges.

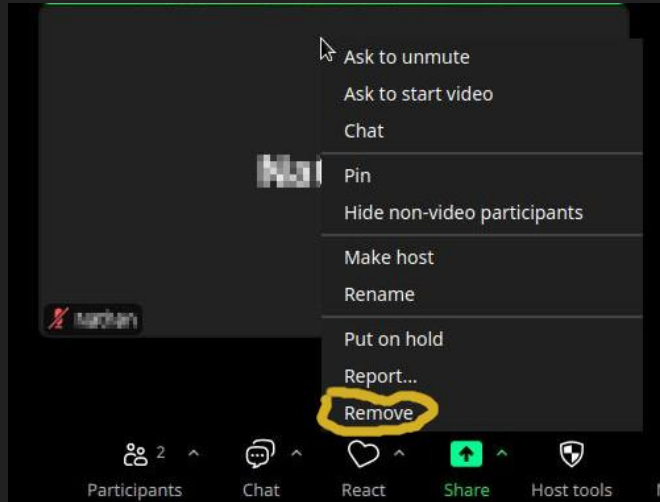

The zoom menu bar should now show a “Host tools” button

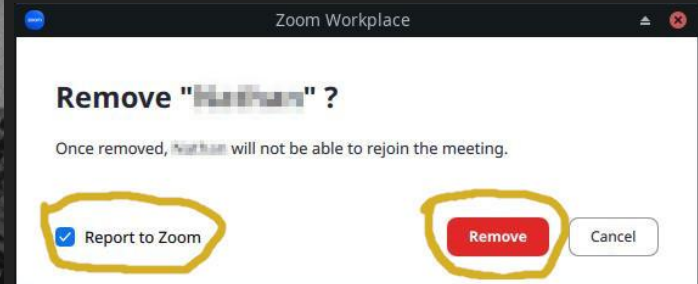

Dropping the Bomber

Right click on the Bomber's video and click "Remove"

Leave "Report to Zoom" checked and click "Remove"

You have now dropped the Bomber. They will be unable to rejoin the meeting.

Enjoy your bomber-free meeting in peace and serenity.

No more worries,

You've learned to drop the bomber!
